1. Incident Name: <div style="text-align: center;">COUNTY</div>	2. Operational Period: <div style="display: flex; justify-content: space-between;"> <div>Date From: 07/11/2018 Time From: 0700</div> <div>Date To: 07/12/2018 Time To: 0700</div> </div>																				
3. Objective(s): <u>Strategic Objectives</u> <p>A full suppression strategy is to be implemented on the County Incident. Values at risk associated to the incident include human safety, private property and associated improvements, electrical power infrastructure, and cultural values. Minimize acres burned on all lands by utilizing effective and efficient strategies and tactics while maintaining safety first.</p> <u>Leaders Intent</u> <p>Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take the appropriate actions regarding:</p> <ul style="list-style-type: none"> Professional behavior, conduct timely/effective communications Personal safety and safety of others, including driving slowly, safely and defensively Implementation of tactics that offer a high probability of success Manage fatigue by taking breaks and maintaining work/rest cycles <u>Management Objectives</u> <ul style="list-style-type: none"> - Maintain safe work practices while minimizing threats to the public and emergency responders - Minimize damage to structures, private property and other improvements in the fire area - Continue fireline suppression repair while protecting natural, cultural, and heritage resources - Continue to foster and maintain positive relationships with all local cooperators and stakeholders - Provide timely and accurate incident information - Maintain fiscal accountability keeping costs commensurate with values at risk <u>Control Objectives</u> <ul style="list-style-type: none"> - Keep the fire within the established containment / control lines 																					
General Situational Awareness: <p>Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.</p> <p><u>Stop, Think, Organize, Proceed</u></p>

County Fire Incident Weather Forecast

FORECAST NO: 10 D/N
PREDICTION FOR: Wednesday 24 Hour Shift
SHIFT DATE: July 11, 2018
FORECAST ISSUED: 2000 PDT July 10, 2018

NAME OF FIRE: County Fire
UNIT: LNU
Incident Meteorologists: Jeff Tonkin
Stephen Bodnar (T)

WEATHER DISCUSSION: High pressure will remain anchored over the region through next week promoting hot and dry conditions. Subtle warming is possible Wednesday then a few degrees of cooling is possible Thursday and Friday as clouds pass through the area. The best chance for precipitation associated with this moisture will be east of the fire in the Sierra Nevada Mountains. A warming trend is expected by the weekend and extending into early next week. There will be a slight increase in west to southwest winds Thursday evening; otherwise light terrain driven winds are expected.

WEATHER FORECAST TODAY (WEDNESDAY DAY SHIFT):

SKY/WEATHER: Sunny, hot and dry.

MAX TEMPERATURES: 94 - 98° mid slopes and ridgetops. 98 - 103° lower slopes and valleys.

MIN HUMIDITY: 8 - 16%.

WINDS (20 FT):

North to northeast 4 to 8 mph in the morning...becoming upslope to northeast 3 to 8 mph after 0900 PDT. Winds switching west to southwest 6 to 9 mph with gusts to 15 mph after 1500 PDT...Divisions O and J...Gusts 18 to 25 mph late afternoon and evening.

LAL: 1 CWR: 0%

STABILITY / INVERSION: Moderately unstable.

SMOKE TRANSPORT WIND: West to southwest 15 mph.

WEATHER FORECAST WEDNESDAY NIGHT:

SKY/WEATHER: Clear.

MIN TEMPERATURES: 64 - 69°.

MAX HUMIDITY: 20 - 30% ridges. 35 - 45% slopes and drainages.

WINDS (20 FT):

West and southwest 6 to 9 mph gusts to 15 mph in the evening...becoming variable 2 to 5 mph after 0200 PDT.

OUTLOOK FOR THURSDAY: Partly cloudy then mostly cloudy overnight. Max Temps: 95 - 99°. Min RH: 11 - 17%. Wind: Upslope 3 to 7 mph...becoming west and southwest 6 to 9 mph with gusts to 15 mph after 1400 PDT. Wind gusts increasing to 18 to 25 mph in the evening.
Smoke Transport Wind: Southwest 15 mph.

EXTENDED FORECAST FRIDAY THROUGH SUNDAY: Partly cloudy Friday then becoming mostly clear over the weekend. Continued dry with temperatures warming through the weekend. Max Temps 94 - 98° Friday then 97 - 106°. Min RH: 9 - 20%. Terrain driven winds 3 to 7 mph...becoming west to southwest 6 to 10 mph with afternoon and evening gusts from 15 - 18 mph. Smoke Transport Wind: Southwest 15 mph.

OBSERVED WEATHER FROM YESTERDAY (TUESDAY):

<u>RAWS</u>	<u>MAX TEMP</u>	<u>MIN RH</u>	<u>WIND DIRECTION / SPEED MPH</u>
BROOKS	99	15%	east / southeast / 6 Gusts 15

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 011	TYPE OF FIRE: Wildfire
FIRE NAME: County	OPERATIONAL PERIOD: July 11, 2018
	TIME ISSUED: 2000 hrs.
UNIT: CAL FIRE-Sonoma Lake Napa	Jon Heggie Fire Behavior Analyst <i>Jon Heggie</i>

INPUTS

WEATHER SUMMARY:

Daytime: Sunny with temps near 94° to 98° and minimum relative humidity between 8%-16%. Winds will surface from the west and southwest after 1500 hrs. at 6-9 mph with gusts up to 15 mph.

Night time: Clear with temps near 64° to 69° and maximum relative humidity between 35-45%. Winds will be from the west and southwest at 6-9 mph with gusts up to 15 mph and will diminish after 0200 hrs. Please review incident weather forecast.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Most fire activity will be concentrated to interior islands throughout the incident. Branch II will be the most susceptible for escape from control lines with a large amount of heat signatures close to control lines. If a spot gets outside the perimeter, it will establish quickly and be challenging to suppress. All other branches are expected to have minimal fire activity, but hotter and dryer weather will increase activity of interior islands and 1000 hour fuels.

Probability of Ignition 100% Spotting Distance 1/4 mile Fine Dead Fuel Moisture 2-3%

SPECIFIC:

Branch II

Heavier fuels in the branch will retain heat and require extensive mop up to mitigate any potential threats to established control lines. Pockets of unburned islands will become active as the solar radiation heats available fuels. Potential for ember cast outside of the perimeter will be high. If a spot becomes established, expect rates of spread to exceed 200 ch/h in grass and 150 ch/h in the brush where wind and slope align.

Branch IV

Fire activity in this branch is expected to be minimal but fire weakened trees may fail and could roll into unburned fuel. Hotter and dryer conditions will cause pockets of unburned fuel to become active and may impact control lines. If fire becomes established outside control lines, the expected rates of spread in the grass can exceed 175 ch/h and 125 ch/h in the brush where wind and slope align.

Branch VIII

Large interior islands may become active under hotter and dryer weather. Scattered heat signatures still are present close to control lines and could be a threat. Burning islands may cast embers across established control lines. If fire escapes established control lines the rates of spread in the grass can exceed 200 ch/h and 150 ch/h in the brush where wind and slope align.

Contingency

Suppression repair must utilize 95-15-15 thresholds for weather to reduce accidental ignitions. Continue to monitor weather and the main fire for flare ups that may impact this operation.

AIR OPERATIONS: Good visibility is forecasted for this operational period.

SAFETY

- Fire weakened trees can fall with no warning.
- Definition: Spot Fire- A fire ignited outside the perimeter of the main fire by rolling or flying sparks or embers.
- Definition: Flare Up- Any sudden acceleration of fire spread or intensification of a fire.

CAL FIRE INCIDENT MANAGEMENT TEAM 3

1. INCIDENT NAME:	2. DATE PREPARED:	3. TIME PREPARED:
County	07/10/2018	1800
4. PREPARED BY:	5. LEADER NAME:	6. OPERATIONAL PERIOD:
David Brockman SOF1 (T)	David Sargenti SOF1	07/11/2018 0700 TO 07/12/2018 0700

SAFETY MESSAGE

Maintain situational awareness and expect the unexpected!

- Understand the plan for the day and your role in the plan.
- Make sure everyone gets a briefing on the plan for the day!
- Roadway conditions may change. Drive defensively and slow down.
- Monitor your hydration/nutrition intake and keep adequate supplies of each.
- Be alert on narrow roads. Watch for other traffic.
- Trees are weakened due to fire activity. Look Up, Look Down, and Around.
- Beware of environmental hazards such as bee hives, poison oak, trip hazards, steep slopes and stump holes.

15. WIND INCREASES AND/OR CHANGES DIRECTION

CAL FIRE INCIDENT MANAGEMENT TEAM 3 SOF1 David Sargenti

INCIDENT RISK ANALYSIS ICS 215A

BRANCH DIVISION	HAZARDOUS ACTIONS/ CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	FIRE AND DROUGHT WEAKENED TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines IRPG (p. 22). Many of the trees within the fire area and along roadways are stressed. Snags are present. Be aware that trees may fall even if not impacted by the fire.
ALL	MOP UP	<ul style="list-style-type: none"> Do not get complacent during mop up. Watch your footing. Wear your PPE.
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Watch your speeds. Watch for debris in roadways. Expect increased civilian traffic in the populated areas.
ALL	WEATHER	<ul style="list-style-type: none"> Hot and dry weather will continue. Watch for changing weather conditions. The local pattern is a daily afternoon wind shift. Stay prepared.
ALL	PERSONNEL SAFETY	<ul style="list-style-type: none"> All personnel are responsible for their personal safety. Be sure to wear all required PPE while on the fire line. Be cautious of snakes and yellowjackets within the fire area.
ALL	POWER LINES	<ul style="list-style-type: none"> Follow Power Line safety guidelines IRPG (p. 24). Treat all downed power lines as energized.
ALL	HYDRATION	<ul style="list-style-type: none"> Drink water before, during and after each shift. Be alert for signs of heat stress in yourself and others.
ALL	FATIGUE	<ul style="list-style-type: none"> Monitor incoming and outgoing resources for level of fatigue. Provide sufficient rest during the work cycle.
ALL	CIVILIAN PRESENCE	<ul style="list-style-type: none"> Be aware of civilians in the area. Civilians may be distracted by the fire operations. Stay alert.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Check the communication plan for frequency assignments. Use human repeaters as needed.
ALL	BRIEFINGS	<ul style="list-style-type: none"> Make sure everyone gets a briefing on the plan for the day. Document this on your ICS 214.
ALL	LCES	<ul style="list-style-type: none"> Ensure that LCES is being utilized.
ALL	AIRCRAFT AWARENESS	<ul style="list-style-type: none"> Be aware of rotor wash when working near helicopters. Understand that hazard trees may react to helicopters overhead. Monitor assigned aircraft frequencies.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Maintain situational awareness. Be prepared for extreme fire behavior in all presented fuel types. Live fuel moistures are Critically Low.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Review IRPG (p. 86). Provide working space around equipment. Avoid working below equipment where rollout is a potential.

8. MEDICAL EMERGENCY PROCEDURES**LINE EMERGENCY:** Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - FEMT / FEMP
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic; as needed for Minor/Major Emergency
- Communications will switch all emergency traffic to CALCORD as needed or requested.
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on CALCORD.
- Medical Unit will:
 - Dispatch air/ground ambulance to as appropriate.
 - If necessary, after patient pickup, dispatch ambulance to helibase for transportation.
 - Notify receiving hospital of injury status.

CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.**INJURY REPORTING PROCEDURES**

NATURE OF INJURY _____

LOCATION OF PATIENT _____

TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___

POINT OF PICKUP _____

LAT _____ LONG _____

PATIENT UNIT ID _____

REMINDER: DO NOT GIVE PT NAME OVER RADIO

IS AN EMT WITH PATIENT: YES ___ NO ___

AGE _____

SEX: MALE ___ FEMALE ___

ALL EMERGENCIES—Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

TRAINING SPECIALIST MESSAGE

Today at 1200 hours is the deadline to close out your training assignment. If you do not close out with the TNSP, you will not receive documented credit for this incident.

Bring the following to the "exit interview"

- Your properly initiated Position Task Book
- Completed and signed ICS 225 Performance Evaluation
- Completed and signed Evaluation Record

Forms are available at the Training Desk
Remember: No documentation- it didn't happen!

Rob Scott TNSP 949-292-3207
Justin Voyson TNSP (T) 661-547-8629

CAL FIRE INCIDENT MANAGEMENT TEAM 3

DEMOBILIZATION MESSAGE

County Incident
CA-LNU-009502

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

In readiness is all

Update

409.5

MEDIA – The California State Penal Code, Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

Social Media

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

DELIVERY ADDRESS – 1250 Gum Ave. Woodland, Ca. 95776

In readiness is all

COUNTY INCIDENT FINANCE SECTION MESSAGE

ALL FINANCE FUNCTIONS FOR THE COUNTY INCIDENT ARE LOCATED AT COUNTY ICP, YOLO COUNTY FAIR GROUNDS.

IF YOU HAVE OUTSTANDING ISSUES FROM THE "PAWNEE" INCIDENT, PLEASE SEE FINANCE.

FINANCE WILL CONTINUE TO BE LOCATED IN THE HOME ARTS BUILDING UNTIL SUNDAY, JULY 15th.

SHIFT TICKETS / HIRED EQUIPMENT VENDORS:

Line supervisors are responsible for completing shift tickets for all hired equipment resources working for them. Please turn completed shift tickets into the CAL FIRE Time Unit at the end of your shift. We will not accept shift tickets from vendors.

FEDERAL TIME:

The FEDERAL TIME UNIT and FEDERAL COMP CLAIMS are located at the Yolo Fairgrounds ICP.

LOCAL GOVERNMENT TIME KEEPING:

The CAL OES representative is on site at the ICP to handle F-42 and any questions you may have.

INJURIES, SUPPRESSION DAMAGES AND EQUIPMENT DAMAGE:

Please report all Injuries, fire suppression damage and equipment damage to the Comp Claims Unit Leader. For Fire Suppression Damages, we will need location, lat/long, property owner, type of damage, photos, etc. Examples of "fire suppression" damage: damaged fences, crushed culverts, pipe damage, broken gates, etc.

Absolutely no off site feeding or purchases charged to the incident. They must be pre-approved by the Logistics Section and/or Finance Section Chief.

ROGER RAINES, FSC1

INCIDENT MANAGEMENT TEAM 3

FIRE SUPPRESSION REPAIR PLAN: COUNTY INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be returned to functional status in order to prevent further damage. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

Dozer Line Repair

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles may be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rocky areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.

**Archaeological and Historic Properties:
General Fire-line Guidance for the BLM Ukiah Field Office.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that much of the area has never been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
